SWG100 BIO-EX

The zone 2-analyzer.

Stationary Biogas measuring system for continuous measurements in Ex-zone 2

SWG100 BIO-EX

The ATEX-certified analyzer

The MRU biogas analyzer of series SWG100 BIO-EX is designed for use in the hazardous zone 2 environment of different sites where biogas is produced.

The analyzer can be installed in outdoor or indoor locations. It can sample dry or wet biogas, pressurized or low pressure gas and can be used from single point sampling up to max. 6 sampling points.

These are the special advantages:

- Industry compatible rugged design with stainless steel IP 65 cabinet with ATEX certification according to II 3G Ex nA nC IIC T3 Gc
- Efficient sample gas conditioning with gas cooler and condensate draining pump
- Sampling from -100 mbar to +200 mbar
- H₂S very high measurement using a special dilution system
- Direct and continuous/discontinuous measurement, with pressure and temperature compensation and event data logging
- Up to 6 sites monitoring (time sharing technique) with only one analyzer
- Ready to run delivery, minimum installation work

The device in detail

An overview of the special features

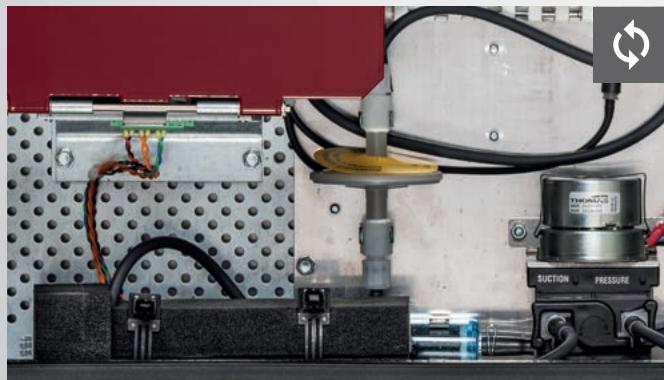

Multiple sampling point monitoring

up to 6 sites with one unit, incl. auto cal inlet

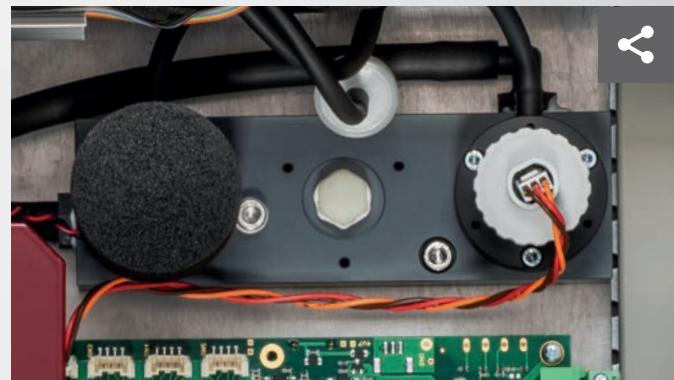

Cabinet heating (option)

Temperature regulated, for use in safe environment

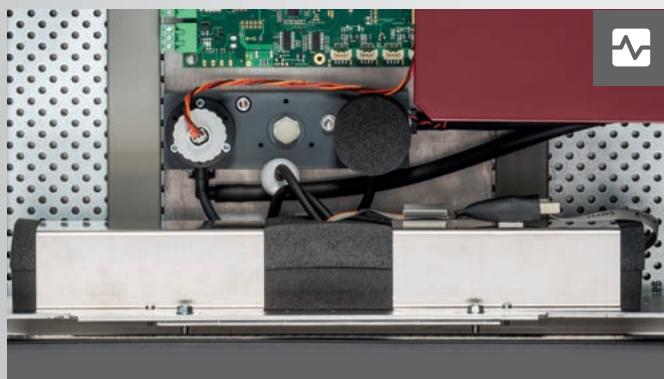

Sample gas cooler

with automatic condensate pump and bottle

Electrochemical gas sensors

for analysis of O₂ and H₂S

NDIR-bench

for analysis of CH₄/CO₂, 0 ... 100%, for biogas-, biomethane- and offgas measurements

I/O-module

with 4-channel, 4 ... 20 mA analogue output and 2 alarm relais (NO contacts)
