

# Digital manifold

testo 550 - the manifold with Bluetooth and 3-hose filling set for refrigeration systems and heat pumps

Bluetooth connection to testo Smart App for quick, convenient monitoring and reporting on site

Refrigerant update in the instrument via App

Calculation of superheating/subcooling in real time via two external temperature probes

2-way valve block with three connections, three hose parkers and sight glass

250 hours' battery life

The testo 550 digital manifold is the robust tool for daily use on refrigeration systems and heat pumps. The robust 2-way metal valve block with 3 connections and 3 hose parkers allows you to work quickly and easily.

The Bluetooth connection to the testo Smart App opens up new possibilities for efficient analysis and documentation. Via wireless connection, users can read the measurement data on a smartphone or tablet, thus working considerably faster and more conveniently. Measurement data is automatically saved in the app and measuring points can be assigned for straightforward documentation. In addition to this, the user can finalize and send the measurement report directly on site. The app can also be used to update the list of stored refrigerants, for example.

The more robust housing with a metal frame around the display protects the digital manifold testo 550 from impact even more reliably. The vacuum display indicates the level of vacuum reached in evacuation. The testo 550 is thus excellently suitable for commissioning, service and maintenance. Thanks to additional features such as the automatic heat pump mode, which eliminates the need to switch over the hoses, and the temperature-compensated tightness test function, working on refrigeration systems and heat pumps is easier than ever before.
